RETRIEVE BIG GAME EASILY WITH THE NEW PORTABLE CAPSTAN WINCH

The new Honda-powered capstan winch from *Portable Winch Co.* is the outdoorsman's best friend. Use it to retrieve big game out of lakes and canyons, move logs and trees, haul boats and docks, get your 4x4 unstuck – your imagination is the only limit!

Powered by a dependable 2.5 hp Honda 4-stroke engine, the Portable Winch is easy to use. Simply anchor it to a tree using the polyester sling provided – it won't damage tree bark. Attach the low-

stretch polyester rope to your load and walk back to the winch. Any rope length may be used – it only weights 7 lb per 100 foot length!

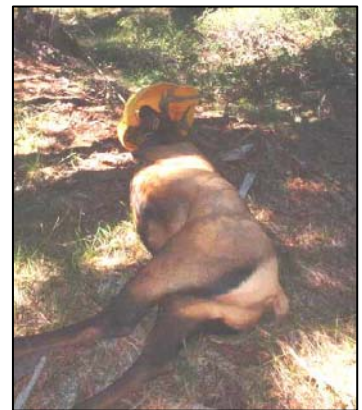

Simply wrap the rope around the capstan and bring it in! You can apply 2500 lb of force to the object you are pulling using a single line – and up to 5000 lb using a snatch block – enough to bring your trophy game home.

Weighing only 33 lb, the Portable Capstan Winch is truly portable, very powerful, and offers 100% duty cycle – it won't heat up or drain your battery. The five (5) year warranty on the winch (two (2) years on the Honda engine) is the pledge of a quality, well-made product that will be there where you need it, when you need it, for years and years to come.

A full range of accessories, such as hitch attachments for anchoring, ropes, bags, pulleys and carrying cases is available from *Portable Winch Co.*

For more information, please go to www.portablewinch.com or dial toll-free (Canada and USA): 1-888-388-PULL (7855); from overseas, dial +1 819 563-2193.
